CONSULTING SERVICES

We help you take the guesswork out of decisions and drive your work to the next level with our expert data science services across a diverse set of industries.

TRAINING COURSES & WORKSHOPS

From theoretical statistics and machine learning to applied programming skills, our most popular training courses & workshops can be modified to fit your organization’s needs and taught in a variety of open-source languages and tools including R, Python, Stan, TensorFlow and Julia.

PARTNERSHIP WITH RSTUDIO

We expedite setup and increase productivity with our full-scale procurement, installation, implementation & maintenance with support of RStudio products.

Lander Analytics is led by Chief Data Scientist Jared P. Lander, adjunct professor at Columbia University, author of the bestselling book *R for Everyone* (now in its second edition) and leader of the world’s largest R Meetup. Lander Analytics also produces the R Conference annually in New York, Washington, DC, and Dublin. The Lander Analytics team is comprised of data scientists, statisticians, visual designers, published authors, professors and keynote speakers specializing in applied statistics and machine learning. We are regularly invited to speak in public forums and private events, including conferences, meetups, corporate events, universities, webinars, and keynotes. Visit landeranalytics.com to learn more.
